#### TECHNICAL DATA AND SAFETY DATA PACK

IntaChem® YB-300	<i>Description</i> Yellow brick strong acid cleaner	Page No. 2
---------------------	--	---------------

#### Technical Data Sheet Introduction

YB-300 is primarily a yellow brick stock cleaner, it reduces the tendency for residual, adverse dark stain marks which can result if other HF based chemicals are used. It is quick acting and economical in use.

#### Technical Data Sheet Product description

YB-300 is a viscous aqueous liquid. It is corrosive and contains Hydrofluoric acid (less than 15%). When adequately diluted the organic agents, present are bio-degradable.

#### Technical Data Sheet How to use the product

Large organic deposits should be removed either by a scraper or by power water jetting. The product should be applied on pre-wetted degreased surfaces. Establish the detailed method and contact times by means of a test patch. Apply the product by means of a fibre bristle brush working it into the masonry face and leaving a visible coating on the surface. Working from the top down, ensuring that there are no runs and that a good coating is applied. Normal contact times would be 5 minutes, and certainly no longer than 15 minutes before pressure jetting off with cold water at a rate of 3min/m<sup>2</sup>.

#### Technical Data Sheet General safety precautions

At any time when this product is being transported, or being used, persons handling or carrying the product should have available a 25 litre drum of clean water for use in emergencies and HYDROFLUORIC ACID ANTIDOTE GEL for immediate treatment of accidental splashes or burns. Containers should be stored in a safe place with caps secured, and a trained responsible person detailed for security in depots, in transit and on site. Spillages must be dealt with immediately. Only competent persons should handle the product.

IntaChem Solution Technology understands that the user of this product will only permit trained and competent operatives to handle, use, and store this product. Further it is understood that the operative will have had full access to this document containing both the Technical Data Sheet and the Safety Data Sheet before its handling, use and storage. And that only competent façade cleaner operatives will undertake works in harmony with the contractor's own Method Statement and Risk Assessment. IntaChem® is a registered trademark used under license by Priestman Associates LLP | Co. Reg. OC368277 | 1 Irwin Drive, Nottingham NG6 7BJ | Tel: 0115 975 1880 | info@intachem-solutions.com

#### TECHNICAL DATA AND SAFETY DATA PACK

IntaChem® YB-300	<i>Description</i> Yellow brick strong acid cleaner	Page No. 3
---------------------	--	---------------

#### Technical Data Sheet Materials to be avoided

Not to be mixed with Algae Rem as dangerous fumes will be created.

Glass, polished granite, glazed aluminium, zinc, bronze, brass, copper and lead. RS250 is preferable for use with red sandstone. Some sandstones may become discoloured due to iron migrating onto the stone face where it associates with dirt and carbon deposits. The verification of any colouration changes should be observed during test trial work. This product is NOT suitable for use on limestone, Portland Stone, Bath stone, marble, slate or calcited materials.

#### Technical Data Sheet Protection of operative

Chemical protective suits are needed along with PVC gauntlets, face shields, head cover and suitable footwear. A bucket of clean water for emergencies should be to hand. Nobody must be allowed to pass underneath or work under cleaning area. Spillages must be washed down immediately. At the end of the work period wash down all equipment (e.g. scaffolding and boards). A HYDROFLOURIC BURNS KIT should be at hand for the treatment of any acid burns. Only experienced operatives should handle this product (see HYDROFLOURIC ACID TREATMENT SHEET).

#### Technical Data Sheet First aid advice

See HYDROFLOURIC ACID TREATMENT SHEET and Safety Data Sheet for this product.

#### Technical Data Sheet Ecology

When diluted the organic ingredients are biodegradable. Effluent, if washed into soil will break down rapidly. If the product is advertently sprayed onto plants/vegetation it should be rinsed off. Rinsing with water will prevent further damage to vegetation. Plastic sheeting could be used to protect such plant life.

IntaChem Solution Technology understands that the user of this product will only permit trained and competent operatives to handle, use, and store this product. Further it is understood that the operative will have had full access to this document containing both the Technical Data Sheet and the Safety Data Sheet before its handling, use and storage. And that only competent façade cleaner operatives will undertake works in harmony with the contractor's own Method Statement and Risk Assessment. IntaChem® is a registered trademark used under license by Priestman Associates LLP | Co. Reg. OC368277 | 1 Irwin Drive, Nottingham NG6 7BJ | Tel: 0115 975 1880 | info@intachem-solutions.com

#### TECHNICAL DATA AND SAFETY DATA PACK

IntaChem® YB-300	<i>Description</i> Yellow brick strong acid cleaner	Page No. 4
---------------------	--	---------------

Using the correct jetting technique ("Environmental Jetting Technique") maximise dilution of the chemical is achieved and no damage has been found to fish when such debris enters rivers and streams (contractors are directed to advise the authorities before disposal and immediately in the event that an accidental disposal into a water course takes place).

#### Disposal of containers:

When empty, containers should be filled with water and then emptied and disposed of in an approved manner.

#### Safety Notes:

1. Always store containers in secure conditions.
2. Keep containers closed when not in use.
3. COSHH Data: Contains Hydrofluoric Acid (less than 15%) UN2922.  
Splashes to the skin may cause burns.
4. Hazard Classification: CORROSIVE
5. Physical data: A viscous aqueous liquid
6. pH Value: Less than 1
7. Flammability: Non- Flammable
8. Fume Hazards: In confined spaces fumes may build up, TLV 8 hours (HF)  
3ppm. Tests may be necessary in confined spaces or behind sheeted scaffolding in hot still weather.
9. Other dangers: Not to be mixed with Algae Rem as dangerous fumes will be created.
10. Handling precautions: Full body, hands, feet, and face protection must be worn.  
A container of clean water, for emergency use, should be on hand.  
Operatives must have HYDROGEN FLOURIDE BURN ANTIDOTE GEL on hand.
11. NEVER leave container full or empty where the public may come into contact with them.
12. ALWAYS fill containers with water before disposing of them.

#### Important Notice:

The statements above are compiled from our field of production and according to the latest technological developments and application techniques received by us. Since application and working are beyond our control, no liability of the producer (or its agents) can be derived from contents of the information sheet or additional correspondence. All statements made in addition to this sheet must be confirmed in writing by the producer (or its agents). In all cases our general conditions of sale are valid. This data sheet was published October 2015 and supersedes any previous edition.

IntaChem Solution Technology understands that the user of this product will only permit trained and competent operatives to handle, use, and store this product. Further it is understood that the operative will have had full access to this document containing both the Technical Data Sheet and the Safety Data Sheet before its handling, use and storage. And that only competent façade cleaner operatives will undertake works in harmony with the contractor's own Method Statement and Risk Assessment. IntaChem® is a registered trademark used under license by Priestman Associates LLP | Co. Reg. OC368277 | 1 Irwin Drive, Nottingham NG6 7BJ | Tel: 0115 975 1880 | info@intachem-solutions.com

### Technical Data Sheet Operative Competency

On the general subject of competency, we further signpost enquirers to the Health & Safety Executive's website. Once on the website search on the keyword **competence**. At time of publication the HSE described *Competence* as:

"Competence can be described as **the combination of training, skills, experience and knowledge that a person has and their ability to apply them to perform a task safely**. Other factors, such as attitude and physical ability, can also affect someone's competence. As an employer, you should take account of the competence of relevant employees when you are conducting your risk assessment. This will help you decide what level of information, instruction, training, and supervision you need to provide."

Largely the UK construction industry uses a skills card scheme called Construction Skills Certification Scheme or CSCS. Those using this product would most likely show on the reverse side of their CSCS card the occupation: Façade Cleaner or if they do not hold a CSCS they are likely to hold an NVQ level 2 in Façade Preservation or a Level 3 NVQ in Heritage Façade Preservation. Supervisors may hold a Level 3 NVQ in Occupational Work Supervision Construction with an awarding body endorsement letter for Façade Preservation. Managers may hold a Level 6 NVQ in Construction Site Management Conservation.

IntaChem Solution Technology understands that the user of this product will only permit trained and competent operatives to handle, use, and store this product. Further it is understood that the operative will have had full access to this document containing both the Technical Data Sheet and the Safety Data Sheet before its handling, use and storage. And that only competent façade cleaner operatives will undertake works in harmony with the contractor's own Method Statement and Risk Assessment. IntaChem® is a registered trademark used under license by Priestman Associates LLP | Co. Reg. OC368277 | 1 Irwin Drive, Nottingham NG6 7BJ | Tel: 0115 975 1880 | info@intachem-solutions.com

Safety Data Sheet according to 1907/2006/EC Article 31

## Section 1: Identification of the substance/mixture and of the company/undertaking

### 1.1. Product Identifier

**Product name:**

YB300

### 1.2. Relevant Identified uses of the substance or mixture and uses advised against:

**Description:**

Product Use [SU3] Industrial uses: Uses of substances as such or in preparations at industrial sites; [SU19] Building and construction work; [PC0] Other; [PROC11] Non industrial spraying; [ERC8b] Wide dispersive indoor use of reactive substances in open systems [ERC8e] Wide dispersive outdoor use of reactive substances in open systems;

Acidic Cleaning Solution.

### 1.3. Details of the supplier of the safety data sheet:

**Company:**

**IntaChem® Solution Technology**  
*a trading name of*  
*Priestman Associates LLP*

**Address:**

1 Irwin Drive, Nottingham, UK NG6 7BJ

**Website:**

[www.intachem-solutions.com](http://www.intachem-solutions.com)

**Telephone:**

0115 975 1880

**Email:**

---------------------	---	----------------

Safety Data Sheet according to 1907/2006/EC Article 31

## Section 4: First Aid Measures

### 4.1. Description of first aid measures

<b>General advice</b>	Consult a physician. Show this safety data sheet to the doctor in attendance. Hydrofluoric (HF) acid burns require immediate and specialized first aid and medical treatment. Symptoms may be delayed up to 24 hours depending on the concentration of HF. After decontamination with water, further damage can occur due to penetration/absorption of the fluoride ion. Treatment should be directed toward binding the fluoride ion as well as the effects of exposure. Skin exposures can be treated with a 2.5% calcium gluconate gel repeated until burning ceases. More serious skin exposures may require subcutaneous calcium gluconate except for digital areas unless the physician is experienced in this technique, due to the potential for tissue injury from increased pressure. Absorption can readily occur through the subungual areas and should be considered when undergoing decontamination. Prevention of absorption of the fluoride ion in cases of ingestion can be obtained by giving milk, chewable calcium carbonate tablets or Milk of Magnesia to conscious victims. Conditions such as hypocalcemia, hypomagnesemia and cardiac arrhythmias should be monitored for since they can occur after exposure.
<b>Inhalation:</b>	Move the exposed person to fresh air. If not breathing, give artificial respiration.
<b>Eye contact:</b>	Rinse immediately with plenty of water for 15 minutes holding the eyelids open.
<b>Skin contact:</b>	Wash off immediately with plenty of soap and water. Remove contaminated clothing.
<b>Ingestion:</b>	DO NOT INDUCE VOMITING. Rinse mouth with water.

### 4.2. Most important symptoms and effects, both acute and delayed

<b>Inhalation:</b>	Risk of producing lung oedema.
<b>Eye contact:</b>	Causes severe burns to eyes. The eyes may water profusely. There may be severe pain. The vision may become blurred. There may be permanent damage.
<b>Skin contact:</b>	Painful burns (effects may not be immediate).
<b>Ingestion:</b>	Corrosive to mucous membranes.

### 4.3. Indication of any immediate medical attention and special treatment needed

<b>Inhalation:</b>	Seek immediate medical attention. (show the label where possible).
<b>Eye contact:</b>	Seek immediate medical attention. (show the label where possible).
<b>Skin contact:</b>	Seek immediate medical attention. (show the label where possible).
<b>Ingestion:</b>	Seek immediate medical attention. (show the label where possible).

### TECHNICAL DATA AND SAFETY DATA PACK

IntaChem® YB-300	<i>Description</i> Yellow brick strong acid cleaner	Page No. 11
---------------------	--	----------------

5.1. <b>Extinguishing media:</b>	Use extinguishing media appropriate to the surrounding fire conditions.
5.2. <b>Special hazards arising from substance or mixture:</b>	Burning produces irritating, toxic and obnoxious fumes.
5.3. <b>Advice for fire fighters:</b>	Wear self-contained breathing apparatus and protective clothing.
5.4 <b>Further information</b>	Avoid using strong water jets.

Safety Data Sheet according to 1907/2006/EC Article 31

## Section 6: Accidental Release Measures

6.1. <b>Personal precautions, protective equipment, and emergency procedures:</b>	Avoid contact with the eyes and skin. Wear suitable protective equipment. Wear respiratory protection. Avoid breathing vapours, mist or gas. Ensure adequate ventilation. Evacuate personnel to safe areas. For personal protection see section 8.
6.2. <b>Environmental precautions:</b>	Prevent further spillage if safe. Do not allow product to enter drains or any water course. Advise local authorities if large spills cannot be contained.
6.3. <b>Methods and material for containment and cleaning up:</b>	Absorb with inert, absorbent material and dispose of as hazardous waste.  Transfer to suitable, labelled containers for disposal.
6.4. <b>Reference to other sections:</b>	See section 8. EXPOSURE CONTROLS / PERSONAL PROTECTION for further information.  See section 13. DISPOSAL CONSIDERATIONS for further information.

### Section 10: Stability and Reactivity

10.1 <b>Reactivity:</b>	Not determined.
10.2 <b>Chemical stability:</b>	Stable under normal conditions. <b>Thermal decomposition / conditions to be avoided:</b> No decomposition if used according to specifications.
10.3 <b>Possibility of hazardous reactions:</b>	Reacts with metal to form Hydrogen.
10.4 <b>Conditions to avoid:</b>	Heat. Flames. Sources of ignition. Direct sunlight.
10.5 <b>Incompatible material:</b>	Strong bases. Strong oxidizing agents.
10.6 <b>Hazardous decomposition products:</b>	In combustion emits toxic fumes.

Safety Data Sheet according to 1907/2006/EC Article 31

### Section 11: Toxicological Information

11.1 <b>Information on toxicological effects</b>	
11.2 <b>Skin corrosion/irritation:</b>	Painful burns (effects may not be immediate).
11.3 <b>Serious eye damage/irritation:</b>	Causes severe burns to eyes. The eyes may water profusely. There may be severe pain.  The vision may become blurred. There may be permanent damage.
11.4 <b>Acute toxicity:</b>	Toxic if swallowed Fatal in contact with skin Toxic if inhaled Causes severe skin burns and eye damage
<b>Ingestion:</b>	Corrosive to mucous membranes.
<b>Inhalation:</b>	Risk of producing lung oedema.
<b>Delayed / immediate effects:</b>	Fluoride ion can reduce serum calcium levels possibly causing fatal hypocalcemia, Material can cause severe burns and blistering which may not be immediately painful or visible. The full extent of tissue

damage may not exhibit itself for 12-24 hours after exposure., Material is extremely destructive to tissue of the mucous membranes and upper respiratory tract, eyes, and skin., necrosis of the skin.

Safety Data Sheet according to 1907/2006/EC Article 31

### Section 12: Ecological Information

12.1 <b>Toxicity:</b>	Not determined.
12.2 <b>Persistence and degradability:</b>	Biodegradable
12.3 <b>Bio accumulative potential:</b>	Degraded. Will disperse as ions.
<b>Partition coefficient:</b>	
12.4 <b>Mobility in soil:</b>	Soluble, will disperse and degrade.
12.5 <b>Results of PBT and yPyB assessment:</b>	<b>PBT:</b> Not applicable. <b>vPvB:</b> Not applicable.
12.6 <b>Other adverse effects:</b>	Not expected to be persistent in the environment.

Safety Data Sheet according to 1907/2006/EC Article 31

### Section 13: Disposal Considerations

13.1 <b>Waste treatment methods:</b>	Do not allow product to enter drains. Transfer to a suitable container and arrange for collection by specialised disposal company.  <b>Uncleaned packaging:</b> Recommendation: Arrange for collection by specialised disposal company. Disposal must be made according to official regulations.

Safety Data Sheet according to 1907/2006/EC Article 31

## Section 16: Other Information

### Other information Revision:

This document differs from the previous version in the following areas:

- 1 - Description.
- 1 - Product Use.
- 2 - 2.1. Classification of the substance or mixture.
- 2 - 2.1.2. Classification - EC 1272/2008.
- 2 - Hazard pictograms.
- 2 - Signal Word.
- 12 - 12.1. Toxicity.
- 15 - Labelling.
- 15 - Risk phrases.
- 15 - Safety phrases.

### Text of risk phrases in Section 2:

- R20/21/22  
Harmful by inhalation, in contact with skin and if swallowed.
- R26/27/28  
Very toxic by inhalation, in contact with skin and if swallowed.
- R34  
Causes burns.
- R35  
Causes severe burns.
- R36/38  
Irritating to eyes and skin.
- R37  
Irritating to respiratory system.

### Text of hazard statements in Section 3:

- Full text of classifications [DSD/DPD]**
- |                     |  |
|---------------------|--|
| Acute Tox. 2: H300  | Fatal if swallowed.                      |
| Acute Tox. 1: H310  | Fatal in contact with skin.              |
| Skin Corr. 1A: H314 | Causes severe skin burns and eye damage. |
| Acute Tox. 2: H330  | Fatal if inhaled.                        |
| Skin Corr. 1B: H314 | Causes severe skin burns and eye damage. |
| STOT SE 3: H335     | May cause respiratory irritation.        |
| Acute Tox. 4: H302  | Harmful if swallowed.                    |
| Acute Tox. 4: H312  | Harmful in contact with skin.            |

# SAFETY TREATMENT SHEET FOR HYDROFLUORIC ACID BURNS

## Skin Burns

### SAFETY TREATMENT SHEET FOR HYDROFLUORIC ACID BURNS

#### Skin Burns - First Aid

- 1.1 Immediately wash the burnt area with copious amounts of water for at least 1 minute.
- 1.2 Apply CALCIUM GLUCONATE GEL on and around the burn and massage it in using clean hands (in the event this gel is not immediately available, continuing rinsing with water until it is applied).
- 1.3 Continue to massage in the gel, using repeated applications until 15 minutes after the pain in the burn has subsided, or until medical treatment is available.

### SAFETY TREATMENT SHEET FOR HYDROFLUORIC ACID BURNS

#### Skin Burns – Medical Treatment

- 2.1 Continue inunction with repeated applications of the calcium gluconate gel until 15 minutes after the pain has completely subsided. This may require several hours but so long as improvement in the lesion and symptoms is occurring, massaging with the gel should be continued.  
In cases where a thick necrotic coagulum has formed, it may act as a barrier and prevent the penetration of the gel. This will be indicated by lack of

---------------------	--	----------------

improvement. In these cases, the necrotic tissue should be exercised and the gel massaged into the base of the burn taking the usual aseptic precautions.

2.2 If the burn fails to respond to the calcium gluconate gel, injection of a sterile 10% solution of calcium gluconate (sandoz) into and under the burn should be considered. Relief of the pain is an indication that sufficient solution has been injected. Because of this, an anaesthetic should not be given except in the situation where the skin is tightly adherent to the underlying tissues for instance, the finger pads or in subungual finger and toe burns when slitting or removal of the affected nails may be required. In these cases, a general anaesthetic should be given as local anaesthetic is contra-indicated.

2.3 Subsequent magnesium oxide paste dressings are not indicated but if dressings appear to be required, use the gel for 24 hours.

2.4 After the gel or injection treatment has relieved the pain, it may recur later, especially in the case of burns from diluted acid. The patient should be advised to return for further treatment if the pain recurs.

2.5 Treat symptomatically.

### SAFETY TREATMENT SHEET FOR HYDROFLUORIC ACID BURNS

#### Skin Burns - General

3.1 In large area skin burns, systematic administration of calcium and/or magnesium may be necessary. Six effervescent calcium tablets (sandocal tablets; Sandoz each containing 400mg calcium and 20mg ascorbic acid) should be given in water by mouth every two hours until admitted to hospital. The hospital should be reminded that serum calcium and/or magnesium may have to be replaced intravenously if indicated either by clinical signs e.g. carpopedal spasm, or by electro-lyte monitoring (which should be done frequently) and if calcium gluconate is to be given intravenously it should be administered slowly.

## Eye Splashes

### SAFETY TREATMENT SHEET FOR HYDROFLUORIC ACID BURNS

#### Eye Splashes – First Aid

- 1.1 Irrigate with isotonic saline or water for at least 10 minutes.
- 1.2 Obtain medical treatment.

### SAFETY TREATMENT SHEET FOR HYDROFLUORIC ACID BURNS

#### Eye Splashes – Medical Treatment

- 2.1 Continue irrigation with isotonic saline or water, until the severe pain of the burn is relieved.
- 2.2 Instil several drops of sterile calcium gluconate 10% solution (sandoz)
- 2.3 Treat symptomatically.

## Spillages and disposal

### SAFETY TREATMENT SHEET FOR HYDROFLUORIC ACID BURNS

#### Spillages:

Dilute with plenty of water or cover with soil/sand and dispose of the debris in an approved manner.

### SAFETY TREATMENT SHEET FOR HYDROFLUORIC ACID BURNS

#### Disposal:

Ensure adequate dilution before discharge to drains.
